# European Kick-Out Bond 3

The aim of the European Kick-Out Bond 3 (the “Bond”) is to increase the value of your investment after 6 years, or earlier if the Bond kicks-out.

The Bond is designed to repay your initial capital (“Initial Capital”) and deliver a return if the EURO STOXX 50® increases over the Term. There is also potential for the Bond to ‘Kick-Out’ depending on the performance of the EURO STOXX 50®. This means the Bond matures early, returning your initial capital plus a return of 5.20% simple interest per annum.

The Bond is a maximum 6 year term investment (the “Term”). The Bond is a Euro Medium Term Note (“Bond” or “Note”) issued by a 100% owned subsidiary of Societe Generale (“SG Issuer”) and with Societe Generale acting as guarantor (“Guarantor”). The return on your investment is linked to the EURO STOXX 50® Index (the “Index”). Your capital is fully at risk if the EURO STOXX 50® falls by more than 40% at maturity and if Societe Generale defaults or become insolvent during the Investment Term. Your capital is at risk at maturity date but also during the product lifetime if you terminate early.

**Warning: If you invest in this product you could lose some or all of the money you invest.**

## Investment Return

The Bond is designed to repay your Initial Capital and deliver a return if the EURO STOXX 50® increases over the Investment Term. There is also potential for the Bond to 'Kick-Out' depending on the performance of the EURO STOXX 50® i.e. if the Bond matures early, 100% of your Initial Capital plus a return will be paid out to you.

The risk to your investment will be dependent on the solvency of SG as well as the performance of the EURO STOXX 50®

If at each Annual Observation date the EURO STOXX 50® is equal to or above its starting level, the Bond will mature early (Kick-Out) with a fixed payment of 5.20% per annum not compounded.

If the Bond does not mature early (Kick-Out) and runs for the full 6 years, provided the EURO STOXX 50® is equal to or above its starting level, the return will be 31.20% (5.20% x 6 years).

The Bond aims to return your Initial Capital at maturity. However, if the EURO STOXX 50® falls by more than 40% from the starting level to the maturity level, your Initial Capital will be reduced by 1% for every 1% fall in the EURO STOXX 50® at the end of the Investment Term.

# What are you investing in?

The Bond is designed and distributed by Wealth Options Ltd and aims to provide a gross return of 5.20% for each year of the investment depending on the performance of the EURO STOXX 50®. Your money will be used to buy a Euro Medium Term Note issued by SG Issuer. Euro Medium Term Notes are a type of debt issued by a bank and are ranked pari-passu with deposits and other senior unsecured creditors. In effect, you are lending money to SG for the duration of the Bond. The due and punctual payments by SG Issuer of all sums owed to investors in respect of the Bond are guaranteed by SG, and as a result investors have a credit risk on SG as the issuer and as the Guarantor. The Bond is not a bank deposit and is not insured by any governmental agency or other financial compensation scheme.

## Societe Generale Credit Risk

The Bond is issued as a Euro Medium Term Note by SG Issuer. The notes are debt obligations of SG and all payments with respect to the Bond, including repayment of your initial capital and any return, are subject to the credit risk of SG. The Notes are not bank deposits and are not insured by any governmental agency or other financial compensation scheme. Therefore, if SG were to default on their debt or become insolvent, you could sustain a loss on some or all of your initial capital.

One of the factors to take into account when selecting a counterparty is its long term credit ratings. These are the opinions of a range of credit rating agencies regarding the long term security of the counterparty. A high rating from one or more of the credit rating agencies is not, however, a guarantee that the Issuer will meet their obligation to pay the amount due under the Securities.

Fitch, Moody's and Standard & Poor's are independent ratings agencies that research and grade the ability of financial and other institutions to make the payments due from the Securities issued and/or guaranteed by them. By way of example, Moody's and Standard & Poor's highest possible rating is AAA, followed by AA and A. These three ratings along with their BBB rating are generally regarded as investment grade (i.e. of higher quality).

All of these ratings, except the AAA rating, can also be modified by a plus or a minus to give a counterparty's relative status within the grade; for example, A+, A, A- for the A rating. Ratings from BB downwards are provided in respect of other securities.

The below table shows Standard & Poor's, Moody's and Fitch's Long Term credit rating of SG (as of 22nd April 2014).

Financial Institution	S&P	Moody's	Fitch
Societe Generale	A	A2	A

For more information on credit ratings or other methods of assessing the financial strength of an institution, please consult your financial advisor.

***Ratings accurate as of 15th July 2014. Historical credit ratings refer/relate to past periods and are not a reliable indicator of future ratings.***

# Risks of the Investment explained

## Risk of capital loss

Your initial capital is at risk if the EURO STOXX 50® falls by more than 40% from the starting level to the maturity level, your initial capital will be reduced by 1% for every 1% fall in the EURO STOXX 50® at the end of the Bond. If this is the case you will lose some or all of your initial capital.

## Risk of early redemption

If you redeem your investment before the end of the term, you may get back less than the amount you originally invested.

## Credit risk

By acquiring the product, the investor takes a credit risk on SG, as the issuer and the guarantor i.e. the issuer's and the guarantor's insolvency ((i.e. defaults on its debt, goes bankrupt or similar) may result in the partial or total loss of the invested amount. Also, any payment you receive may be paid at a time which is different to the Maturity Date and may be paid at a time which is significantly later.

## Inflation risk

Inflation may occur over the duration of your Investment and if the returns, if any, on your Investment are lower than the rate of inflation this will reduce what you could buy in the future.

## Market risk

The product may at any time be subject to significant price movement, which may in certain cases lead to the loss of the entire amount invested.

## Liquidity risk

Certain exceptional market circumstances may have a negative effect on the liquidity of the product, and even render the product entirely illiquid, which may make it impossible to sell the product and result in the partial or total loss of the invested amount.

🔄 The past performance of the EURO STOXX 50® is not necessarily an indication of its future performance.

🔄 The tax treatment of the Bond could change at any time and any tax benefits to you may depend on your individual circumstances. There is always a risk that changes to taxation which could affect the tax treatment of the Bond could be applied retrospectively.

🔄 A Bond such as this does not guarantee immediate access to cash without penalty in the event that you require this during the Term. The Bond is not appropriate if you need income from your investment during the Term.

## 5. Holding or Transfer of Client Assets outside Ireland

Redmayne Bentley may hold your money and investments ("client assets") with, or undertake a transaction for you which require Redmayne Bentley to pass your assets to an Eligible Third Party located outside Ireland. In these circumstances the legal and regulatory regime applying to such Eligible Third Party and your rights in relation to the client assets held in such manner may be different to that if such client assets were held by an Eligible Third Party in Ireland. In the event of a default or failure of that Eligible Third Party the client assets may be treated differently from the position which would apply if the assets were held by an Eligible Third Party in Ireland. You hereby consent by accepting these terms to your client assets being held or passed to an Eligible Third Party outside Ireland as described above.

## 6. Pooling of Client Assets

Redmayne-Bentley (or Eligible Third Parties) may hold your assets with other clients' assets as part of a common pool so you do not have a claim against specific assets; your claim is against the client assets pool in general. In the case of any such pooled client account Redmayne-Bentley will:

- (a) ensure that such account is in the name of Redmayne-Bentley, is designated as a client account and that Redmayne-Bentley is entitled to issue instructions in respect of such accounts;

- (b) obtain from the Eligible Third Party with whom the client assets are lodged, acknowledgement that the account is a client account containing client assets; and

- (c) comply with all Client Assets Requirements regarding client assets.

In the case of pooled investments, your individual entitlements may not be identifiable by separate certificates, physical documents or equivalent electronic entries on the register and may be subject to third party claims (including claims by general creditors) made against Redmayne-Bentley or the relevant Eligible Third Party.

## 7. Governing Law

These Terms and Conditions and any non-contractual obligations arising out of or in relation to the Investment will be governed by and construed in accordance with Irish law. The parties agree that the courts of Ireland shall have exclusive jurisdiction to hear and settle any dispute which may arise out of or in relation to these Terms and Conditions and any non-contractual obligations and the parties irrevocably submit to such courts.
