# INTRODUCTION

The turmoil in financial markets over the past six years has caused investors to become more risk averse. Wealth preservation has become the most important investment objective for many investors but they still have to place their money where they think it will achieve the best return for a given level of risk. The challenge, however, is to determine the level of risk that is commensurate with the potential return that may be achieved.

Structured deposits offer a solution to this by enabling investors to manage their risk exposure for a given level of potential return. The opportunity cost is the risk free rate of return that would otherwise be earned over the same deposit term. Investors must therefore evaluate the trade-off between these returns in their quest for better performance.

Other factors that need to be considered include the underlying asset and the term of the deposit. Taking all of these factors into account, investors are increasingly using structured deposits as a separate component in the construction of their investment portfolios in order to produce a more optimal trade-off between risk and return.

## IS THIS SUITABLE FOR YOU?

This product is suitable for investors who:

- have a minimum of €10,000 to invest
- are satisfied with the creditworthiness of KBC Bank Ireland plc, a wholly owned subsidiary of Belgian-based KBC Bank NV
- have a low tolerance to capital risk (the Triple Option Account is 100% capital secure at maturity)
- have a high tolerance to interest risk: any interest is dependent on a positive performance of the Swiss Market Index
- are willing to accept a maximum potential return of 16% (AER 5.07%) in the 3 Year Option, 28% (AER 6.36%) in the 4 Year Option or 42% (AER 7.26%) in the 5 Year Option or a minimum potential return of 0.0%
- are able to commit funds for 3, 4 or 5 years and do not anticipate any need to withdraw that money before the Maturity Date, even in the case of an emergency

# WHY YOU MIGHT INVEST

## The economic policy dilemma

The western world is still suffering from the effects of the financial crisis and economic collapse in 2008. The fundamental problem continues to be the excessive level of debt that has accumulated over the past 30 years. The challenge facing governments and central banks is how to contain the debt crisis and at the same time maintain economic activity during the deleveraging process that is now taking place.

## The US policy response

Optimism that the aggressive measures introduced by the Federal Reserve will sustain economic growth, has supported the US equity market which has been resilient despite expectations of a slower increase in corporate earnings. Similarly, ultra low US government bond yields have not deterred investors in the face of a continuing 'debt super cycle' and renewed scrutiny of the credit worthiness of the US government.

## Euro crisis continuing

The complexity of the euro crisis that began as a banking crisis and extended into a sovereign debt crisis has yet to be resolved but the pronouncement of the European Central Bank that it is willing to do whatever it takes to preserve the euro has calmed investor nerves. The trade-off between fiscal austerity and economic growth is being increasingly challenged in the absence of reforms being agreed to deal with the fundamental shortcomings of the euro currency system.

## Risk appetite increasing

Despite economic and budgetary difficulties, equity markets have been propelled by strong earnings and by abundant liquidity that has been recycled into government bonds, driving yields down and forcing investors to move up the risk curve in the quest for higher returns. The ongoing recapitalisation and deleveraging of the banking sectors in the US and Europe suggest that official interest rates will stay lower for longer and that equity markets may trade within a relatively narrow range.

## The Swiss Market Index

The Index offers a portfolio of twenty well managed and globally diversified companies principally in the health care, consumer goods and financial sectors. The historical monthly volatility of the Index has averaged 14% per annum over the past five years compared, for example, to 16% for the S&P 500 Index and 21% for the EUROSTOXX 50 Index.

# WHAT YOU MIGHT EARN

The Triple Option Account offers the potential to earn interest equal to 200% of the positive performance of the Swiss Market Index over each Term but subject to a maximum return depending on which Option you choose. The maximum return that may be earned is 16% (AER 5.07%) in the 3 Year Option, 28% (AER 6.36%) in the 4 Year Option and 42% (AER 7.26%) in the 5 Year Option. If the performance of the Index is negative or zero over the Term selected, no interest will be earned in respect of that Option.

The table below illustrates how potential returns are calculated, based on a set of assumed Index performances and a DIRT rate of 41%.

# KEY FEATURES

## LET'S TALK ABOUT ME AND MY INVESTMENT OPTIONS

### How does the Triple Option Account work?

#### The Product Producer is:

KBC Bank Ireland plc, Sandwith Street, Dublin 2.

#### Brief Description of the Benefits of the Account:

The Triple Option Account offers you the opportunity to participate in the performance of the Swiss Market Index over a period of 3, 4 or 5 years. You may choose to invest in any one or a combination of these Options. Any interest earned will be based on the positive performance of the Index up to a maximum of 8% in the 3 Year Option, 14% in the 4 Year Option and 21% in the 5 Year Option.

The participation of the Account in the positive performance of the Index is 200% so that any interest earned will be twice the performance of the Index up to a maximum limit in each Option. The maximum potential return that may be earned on the Account is 16% (AER 5.07%) in the 3 Year Option, 28% (AER 6.36%) in the 4 Year Option and 42% (AER 7.26%) in the 5 Year Option. All interest earned will be payable within five Business Days of the Maturity Date of each Option. The minimum return that may be earned on the Account is 0% (CAR 0.0%).

The minimum investment is €10,000 in the Account and €5,000 in any one Option. The maximum investment is €1,500,000. 100% capital security is provided on the Account by KBC Bank Ireland plc.

#### Averaging:

The Account is structured to give a degree of protection against a fall in the level of the Index in the last 6 months of the deposit Term. The Final Price of the Index in respect of each Option is calculated by taking the average level in the 6 months prior to each Final Valuation Date (7 observations) thereby safeguarding against any sharp decline in the run-up to maturity. Conversely, if there is a significant increase in the level of the Index over the final 6 months, the averaging process will lower the return that would otherwise be obtained.

#### Dividends:

The Triple Option Account will not be directly invested in securities which are constituents of the Index and by investing in the Account, neither you, as an investor in the Account, nor the Bank will benefit from any dividends paid on those securities. The Account is therefore suitable only as a capital growth investment.

#### Currency Risk:

The performance of the Index is calculated according to the change in its nominal level and there is consequently no exposure to exchange rates in the Account.

## Where does my investment go?

Your proposed investment will be used, at the date of the deposit, as follows:

- 100% of your investment will be held on deposit with the Bank. In relation to Interest payable on the Account, you will be entitled to the payment of such Interest annually after deduction of tax (if applicable) in addition to the return of 100% of your deposit at maturity.
- The Bank may, on its own account, enter into a swap arrangement with a third party whereby the Bank may agree to exchange the income stream generated by your deposit for such sums as may be necessary to pay any Interest due on the Account. Any such swap arrangement made by the Bank will not affect the obligation of the Bank with regard to any Interest payable to you under the terms of issue of the Account.
- Any benefit that the Bank receives by its use of the proceeds from your deposit over and above the Interest that is payable to you under the terms of the Triple Option Account will be for the Bank's own account. In the event that the Triple Option Account is distributed through an appointed intermediary of the Bank, a distribution fee up to 1.5% in the case of the 3 Year Option, 2.0% in the case of the 4 Year Option and 2.5% in the case of the 5 Year Option of the deposit sum will be payable by the Bank to that intermediary. Any intermediary remuneration will not affect the allocation of your investment in the Triple Option Account or any Interest payable to you under the terms of issue of the Account.

## Do I have access to my investment?

Your investment is for the Term of the Option(s) chosen and the Account and is intended only for investors who do not require access to their deposit prior to the Maturity Date applicable to that Option(s). No withdrawal may be made prior to the Maturity Date applicable to the chosen Option(s). The ongoing cost of funding the underlying structure that will pay any interest to you during the deposit term means that the capital secure portion of the Account is only payable within 5 business days of the Maturity Date applicable to the relevant Option. During each Term, it may be difficult to obtain reliable information about the value of or the extent of the risks to which the deposit is exposed.

## What happens if I die before the Account matures?

In the event of the death of a sole investor or last surviving joint Account holder prior to the expiry of the Term, the Account will continue to the Maturity Date in the name of the executor or administrator.

In the event of the death of a joint Account holder prior to the expiry of the Term, the Account will continue to the Maturity Date in the name(s) of the surviving joint account holder(s).

## What about tax?

Interest payable on the Account is subject to Deposit Interest Retention Tax ("DIRT") where applicable and is currently payable at 41%. On any such interest, DIRT will be deducted prior to any Interest being paid. You should include this interest amount, before DIRT, in your income tax return for the year in which it is received. Both the rate of tax and tax rules are subject to change without notice.

Some Irish resident investors, such as individuals over 65 and those who are permanently incapacitated, may be entitled, in certain circumstances and subject to the completion of certain declaration forms, to be paid interest without the deduction of DIRT. Companies, pension funds and registered charities may be entitled, in certain circumstances, to be paid interest without deduction of DIRT. It is the responsibility of investors to obtain any tax relief that may apply. Tax reliefs are those currently applying, are subject to change without notice and apply directly to the customer. You should satisfy yourself in relation to Revenue reporting requirements and any implications of non-disclosure.

If you are not resident in the Republic of Ireland for tax purposes you may be exempt from DIRT on the Account. It is your responsibility to seek any applicable exemption. The Bank will deduct DIRT from the Account of non residents unless a fully completed non resident declaration form and other verification documentation required has been received by the Bank.
