How the Bond works

As the investor, an individual client account is set up with Redmayne Bentley. Alternatively, if you are a Pension investor, a custodian will be appointed by your life company. You are investing in Securities issued by F. van Lanschot Bankiers N.V. ("Van Lanschot") which will be purchased and held in custody by Redmayne Bentley or your relevant life company custodian. The Securities are a type of debt issued by a bank. In effect you will be lending money to Van Lanschot (as issuer of the Securities) for the duration of the Bond. The Securities returns are linked to the performance of the Eurostoxx 50 Index ("the Index"), and Van Lanschot is legally obliged to pay the returns on the Securities to you as holder of a certain number of the Securities.

The Issuer will be responsible for the payment of any return of capital and any investment return due from the Securities. The return of any capital and any investment return is therefore dependent on the ability of Van Lanschot to make the payments due from the Securities (see page 5). If an investment return is not payable, you will receive a return of the "Capital Protected Amount" at maturity. Please note that the Securities will not pay any interest during the term of the Bond. Instead, at maturity you will receive a minimum of 100% of the money you invested and you may (depending on the performance of the Index) receive an investment return. Senior debt investors have traditionally ranked above subordinated debt and pari passu (the same) with depositors in a bankruptcy.

At maturity, if the Index is up between 0% and 20% from its initial starting level, the interest coupon will be 100% participation in the performance of the Index in addition to 100% of your initial investment. i.e. if the Index is up 14% then your return will be 14%.

At maturity, if the Index is up more than 20% from its initial starting level, then a fixed return of 15% interest coupon is payable in addition to 100% of your initial investment.

At maturity, if the Index is below its initial starting price no interest coupon is payable and the return will be 100% of your initial investment.

How Capital Return is calculated?

The return of 100% of your original capital at the Maturity Date is not based on the performance of the Index. The product is designed to provide 100% return of your capital at the Maturity Date even if the performance of the Index is negative. You should note that the return of 100% of your capital plus your investment return is dependent on the Issuer still being able to meet their obligations to us to pay the amounts due. This is known as Counterparty Risk (see page 5).

Index Final Performance	Payout at Maturity Gross
+19%	100% of capital plus 19% interest
+27%	100% of capital plus 15% interest
0%	100% of capital
-10%	100% of capital

The return of 100% of your capital will only apply at the Maturity Date. Should you surrender your Bond early, you will receive the price offered by the Issuer on the secondary market for the Securities (see Liquidity Risks, page 9).

In this case, it is likely that you will receive less than you originally invested.

Warning: These figures are estimates only. They are not a reliable guide to the future performance of your investment.

Warning: The value of your investment may go down as well as up. You may get back less than you invest.

Warning: If you cash in your investment before the 7th May 2021 you may lose some or all of the money you invest.

Warning: If you invest in this product you may not have access to your money for 6 years.

Warning: If you invest in this product you may lose some or all of the money you invest.

Why the Eurostoxx 50 Index?

The EURO STOXX 50® Index is defined as Europe's leading Blue-chip index for the Eurozone and provides a Blue-chip representation of super sector leaders in the Eurozone. The index covers 50 stocks from 12 Eurozone countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. The Eurostoxx 50 Index is licensed to financial institutions to serve as underlying for a wide range of investment products such as Exchange Traded Funds (ETF), Futures and Options, and structured products worldwide.

There is a general feeling that a weaker Euro and a stronger banking sector will help support European equities over the next few years. The recent actions by the European Central Bank (ECB) should help boost growth in the eurozone. The purchase of asset backed securities once fully bedded down should help boost this growth. The introduction of quantitative easing (QE) could lead to a similar outcome that was experienced in the US where there was a significant upward momentum on US equities following on from their QE programmes.

Warning: Please note that past performance is not a reliable guide to future performance and the value of your investment may go down as well as up.

Counterparty Risk

The performance of your Bond depends on the creditworthiness of Van Lanschot. It is possible that Van Lanschot could collapse or fail to make the payments due to us from the Securities. If this happened you would lose some or all of the money you invest in the Bond, as well as any investment returns from the Bond to which you might otherwise have become entitled.

Selection of a counterparty

One of the factors to take into account when selecting a counterparty is its long term credit ratings. These are the opinions of a range of credit rating agencies regarding the long term security of the counterparty. A high rating from one or more of the credit rating agencies is not, however, a guarantee that the Issuer will meet their obligation to pay the amount due under the Securities.

Fitch and Standard & Poor's are independent ratings agencies that research and grade the ability of financial and other institutions to make the payments due from the Securities issued and/or guaranteed by them. By way of example, Standard & Poor's highest possible rating is AAA, followed by AA and A. These three ratings along with their BBB rating are generally regarded as investment grade (i.e. of higher quality).

All of these ratings, except the AAA rating, can also be modified by a plus or a minus to give a counterparty's relative status within the grade; for example, A+, A, A- for the A rating. Ratings from BB downwards are provided in respect of other securities.

A rating outlook assesses the potential direction of a long-term credit rating view over the intermediate term. In determining a rating outlook, consideration is given to any changes in the economic and fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future credit-watch action.

- Positive means that a rating may be raised.
- Negative means that a rating may be lowered.
- Stable means that a rating is not likely to change.
- Developing means a rating may be raised or lowered.

Long term credit ratings and outlook for Van Lanschot:

Agency	Rating	Outlook
Standard & Poors	BBB+	Stable
Fitch	A-	Negative

Who are Van Lanschot?

The securities are issued by F. van Lanschot Bankiers N.V. (“Van Lanschot”), a specialist, independent wealth manager dedicated to the creation and preservation of wealth for its private and institutional clients. Van Lanschot has a history dating back more than 275 years. Van Lanschot N.V. is the sole shareholder of Van Lanschot, depositary receipts of Van Lanschot N.V. are listed on the Amsterdam stock exchange, with the ticker code LANS:NA.

Van Lanschot operates under the brand names Van Lanschot and Kempen & Co. Private banking, asset management and merchant banking are its core activities. Year-end 2014 private and institutional client assets stood at € 57.4 billion.

Van Lanschot has a strong capital position with a Common Equity Tier I ratio (phase-in, including retained earnings) of 14.6% at 31 December 2014. Van Lanschot meets the Basel III capital requirements with a fully loaded Common Equity Tier I ratio of 13.4% and a leverage ratio of 5.3% at 31 December 2014. A high leverage ratio shows that that the bank has a large capital buffer relative to its total assets.

Van Lanschot aims to have a well-balanced funding profile, comprising a healthy mix of both customer deposits and wholesale funding. The funding ratio of 95.3% at 31 December 2014 indicates that the bank’s loan book is largely funded by the funds entrusted by clients. This source of funding is supplemented with wholesale market funding, which is well diversified in terms of type of instrument and maturity. The creditworthiness of Van Lanschot is reflected in the A- (negative outlook) credit rating awarded by Fitch Ratings (affirmed in September 2014) and the BBB+ (stable outlook) credit rating from S&P (upgraded in November 2014). We recommend that you read Van Lanschot’s recently published results and press releases. This information can be found on <https://corporate.vanlanschot.nl/results>.
